DETAILED ACTION

Response to Amendment

1. This communication is in response to the special amendment of 11/25/2005. All changes made to the specification, drawings, and claims have been entered. Accordingly, Claims 19-25,28,30-33 and 35-50 are currently pending in the application.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Michael J. Ferrazano on December 15, 2005.

The application has been amended as follows:

3. -Claim 24, line 1, the phrase "Computer program product for efficiently transmitting packet data" has been changed to -- Computer program product stored on a computer-readable storage medium for efficiently transmitting packet data --.

Art Unit: 2663

4. -Claim 24, line 14, after semicolon, add -- and --.
5. -Claim 24, lines 17-19, delete “; and computer readable medium for storing the code”.
6. -Claim 42, lines 2-3, the phrase “the results of training sessions information” has been changed to -- training sessions information --.

Allowable Subject Matter

7. Claims 19-50 are allowed.

The following is an examiner's statement for reason for allowance:

8. Claim 19 and 24 is allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose **forming a number of virtual links each being associated with a particular one of the multi media data packet streams wherein each of said virtual links has an associated virtual link bandwidth and a virtual link rate.** It is noted that the closest prior art, Wolf (US 6914637) discloses a method for video and auxiliary data transmission over a serial link involving a transmitter, a receiver, and a serial link, in which encoded data are transmitted from the transmitter to the receiver. However, Wolf fails to disclose or render obvious the above underlined limitations as claimed.

9. Claims 30 is allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose of having the main link include a number of virtual links each being associated with a particular one of the multimedia data packet streams wherein each of said virtual links has an associated virtual link bandwidth. It is noted that the closest prior art, Wolf (US 6914637) discloses a method for video and auxiliary data transmission over a serial link involving a transmitter, a receiver, and a serial link, in which encoded data are transmitted from the transmitter to the receiver. However, Wolf fails to disclose or render obvious the above underlined limitations as claimed.

10. Claims 31 is allowable over the prior art of record since the cited references taken individually or in combination fails to particularly disclose the limitation of having the receiver unit include a time-base recovery unit arranged to regenerate a particular data stream's native rate based upon a time stamp embedded within the data packets and wherein the time stamp is based upon a determination of a number of native stream clocks in 2^{20} cycles of link cycle clock frequency period. It is noted that the closest prior art, Wolf (US 6914637) discloses a method for video and auxiliary data transmission over a serial link involving a transmitter, a receiver, and a serial link, in which encoded data are transmitted from the transmitter to the receiver. However, Wolf fails to disclose or render obvious the above underlined limitations as claimed.

Conclusion

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Nguyen Ngo whose telephone number is (571) 272-8398. The examiner can normally be reached on Monday-Friday 7am - 3:30 pm.
